

Commit2Green supports 8 European cities in developing integrated greening strategies for climate neutrality and urban resilience. The project shifts from isolated nature-based interventions to systemic approaches embedded in city planning.

By connecting district-scale actions with city-wide policies, Commit2Green strengthens participatory design and ecological connectivity.

URBAN GREENING AND RENATURING

Vision:

Enhance the role of nature in cities by aligning ecosystem service supply with local demand, informed through community engagement and district-level analysis.
